Contents of Volume 19

Number 1, September 1976

V. A. Gubanov, N. I. Lazukova, and E. Z. Kurmaev. X-Ray Emission Spectra and Quantum Chemical Calculations of Electronic Structure of Vanadium Oxides 1

Kazuhiro Endo, Shigeru Yamauchi, Kazuo Fueki, and Takahi Mukaibo. Hopping Conduction in a Mixed Valence Oxide System: $Pr_{1-y}Gd_yO_{1.5+\delta}$ 13

G. Le Caer, J. M. Dubois, et J. P. Senateur. Etude par spectrométrie Mössbauer des Carbures de Fer Fe_3C et Fe_5C_2 19

J. Coutures et J. P. Coutures. Etude des Solutions Solides "CeLnO$_3$" et des Perovskites CeLnO$_3$ et PrLnO$_3$ (Ln = élément lanthanidique) 29

Toshiko Kodama and Giichi Muto. The Crystal Structure of Rb–β-Alumina 35

M. N. Deschizeaux, J. C. Joubert, A. Vegas, A. Collomb, J. Chenavas, and M. Marezio. Synthesis and Crystal Structure of $(ThCu_3)$ $(Mn_2^{3+}Mn_2^{4+})O_{12}$, a New Ferrimagnetic Perovskite-like Compound 45

R. J. D. Tilley. The Energy of Crystallographic Shear Plane Formation in Reduced Tungsten Trioxide 53

G. Yamaguchi, M. Shimada, and M. Koizumi. Preparation and Crystal Structure of $Fe(Sb_{1-x}Te_x)_2$ and $Co(Sb_{1-x}Te_x)_2$ $(0 \leqq x \leqq 1)$ 63

M. Astier and P. Vergnon. Determination of the Diffusion Coefficients from Sintering Data of Ultrafine Oxide Particles 67

J. Ackermann, S. Soled, A. Wold, and E. Kostiner. The Preparation and Characterization of the Solid Solution Series $CuFe_xGe_{1-x}S_2$ $(0.5 < x < 1.0)$ 75

H. F. Franzen, A. S. Khan, and D. T. Peterson. Thermodynamics of Solid Solution of Hydrogen in M_2C Type Carbides of Vanadium and Niobium 81

Claude Delmas, Gérard Demazeau, Michel Devalette, Claude Fouassier, et Paul Hagenmuller. Evolution Structurale sons Haute Pression des Phases K_2MO_3(M = Zr, Hf, Sn, Pb) 87

H. V. Keer, D. L. Dickerson, H. Kuwamoto, H. L. C. Barros, and J. M. Honig. Heat Capacity of Pure and Doped V_2O_3 Single Crystals 95

Number 2, October 1976

H. J. Rossell. Crystal Structures of Some Fluorite-Related M_7O_{12} Compounds 103

J. Haber, J. Stoch, and L. Ungier. Electron Spectroscopic Studies of the Reduction of WO_3 113

B. L. Dickson and K. K. P. Srivastava. A Mössbauer Study of the Relaxation Behavior of Dilute Fe^{3+} in $LiScO_2$ and Mullite 117

THOMMY EKSTRÖM AND R. J. D. TILLEY. Ternary Tungsten Oxides with the Mo_5O_{14} Structure 125

PATRICK DOUGIER, DIDIER DEGLANE, ET PAUL HAGENMULLER. Evolution des Propriétés Structurales, Electriques et Magnétiques au Sein du Système $La_{1-x}Ca_xVO_3$ 135

D. KROL, H. RONDE, AND G. BLASSE. The VO_4^{3-} and Eu^{3+} Luminescence in Oxides with Ordered β-K_2SO_4 Structure 143

KATSUMI KUWABARA AND TAKEHIKO TAKAHASHI. Formation of β-Alumina Type Potassium Gallate and Its Ionic Conductivity 147

J. E. GREEDAN, CHAI-LING CHIEN, AND RICHARD G. JOHNSTON. A Systematic Study of Magnetic Order in Divalent Europium Perovskites 155

IAN J. MCCOLM, RALPH STEADMAN, COLIN S. DIMBYLOW, NORMAN N. GREENWOOD, AND GEOFFREY E. TURNER. Preparation and Structure of Mixed Tungsten Bronzes Containing Tin and Europium 161

STEN ANDERSSON, HÅKAN ANNEHED, LARS STENBERG, AND ROLF BERGER. The Defect Structure of V_4As_3 169

G. BUISSON. Préparation et Propriétes d'un Oxychlorure de Manganese de Formule $Mn_8O_{10}Cl_3$ 175

D. VAN DYCK, J. VAN LANDUYT, A. AMELINCKX, NGUYEN HUY-DUNG, AND CHRISTIAN DAGRON. Direct Lattice Imaging of Polytypes in YSeF 179

J. DEXPERT-GHYS, M. FAUCHER, AND P. CARO. Optical and Structural Investigation of the Lanthanum β-Alumina Phase Doped with Europium 193

Number 3, November 1976

BERNARD DARRIET, JAN-OLOV BOVIN, ET JEAN GALY. Un nouveau composé de l'antimoine III: $VOSb_2O_4$. Influence stéréochimique de la paire non liée *E*, relations structurales, mécanismes de la reaction chimique 205

JACQUES DARRIET, MARC DRILLON, GÉRARD VILLENEUVE, ET PAUL HAGENMULLER. Interactions magnétiques dans des groupements binucléaires du Ruthénium +V 213

A. J. H. MACKE. Luminescence in the System $Mg_4T_{2-x}Nb_xO_9$ 221

THOMMY EKSTRÖM AND R. J. D. TILLEY. The Stability of the Perovskite-Type Zirconium Tungsten Bronze Zr_xWO_3 227

DANIEL GROULT, JEAN MICHEL CHAILLEUX, JACQUES CHOISNET, ET BERNARD RAVEAU. Sur une Nouvelle Famille d'Oxydes Ternaires de Niobium, $A_3M_8O_{21}$ à Structure en Cages 235

MARKKU LESKELÄ AND LAURI NIINISTÖ. Solid Solutions in the Rare-Earth Oxysulfide Series 245

G. BACQUET, J. DUGAS, C. ESCRIBE, AND A. ROUANET. The System ZrO_2–CaO Studied by the Electron Spin Resonance of Mn^{2+} Ions 251

J. TH. W. DE HAIR AND G. BLASSE. The Luminescence Properties of the Octahedral Uranate Group in Oxides with Perovskite Structure 263

ELIZABETH GEBERT SHERRY. The Structure of $Pr_2(SO_4)_3 \cdot 8H_2O$ and $La_2(SO_4)_3 \cdot 9H_2O$ .. 271

M. M. KARNOWSKY, R. P. CLARK, AND R. M. BIEFELD. The Phase Diagram for the Binary System K_2CrO_4–$CaCrO_4$ 281

P. L' HARIDON, J. DAVID, J. LANG, AND E. PARTHÉ. BeP_2: A Tetrahedral Structure of Type Order–Disorder which Obeys a Coordination Rule for Short-Range Order 287

A. NØRLUND CHRISTENSEN, P. HANSEN, AND M. S. LEHMANN. Isotope Effects in the Bonds of β–CrOOH and β–CrOOD 299

CHRISTIANE PERRIN, ROGER CHEVREL, ET MARCEL SERGENT. Nouveaux Thiocomposés de Molybdène et de Rhenium $M[Mo_2Re_2]S_8$ (M = Fe, Co, Ni, Zn) Présentant un Cluster Mixte Tétraédrique $[Mo_2Re_2]$ 305

AUTHOR INDEX FOR VOLUME 19 395

CUMULATIVE SUBJECT INDEX FOR VOLUMES 16–19 397

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, lectronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions re both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid com- nunications of important new work). Notes are limited to 1200 words and are given accelerated review and pub- cation. English, French, and German are the official languages of the Journal. Contributions in Russian are cceptable, but they will be translated into English before publication. Manuscripts should be submitted to the Editor (M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member f the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of najor sections should be typed in capital letters and centered on the page. Each page of the manuscript should be umbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For nultiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should onsist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding natters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation n the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, ower-case italic letters (^{a}, ^{b}, ^{c}). Tables longer than two manuscript pages should be submitted as clear, sharp lossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page fter 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be eposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must e deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page his corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $15.00 for up to 98 pages of standard-size or 48 pages of versize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the eposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The llowing footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to eference deposited material.

Supplementary material has been deposited as Document No. NAPS ..... with the National uxiliary Publications Service, c/o Microfiche Publications, 440 Park Avenue South, New York, New York 0006. A copy may be secured by citing the document number and by remitting $ for photocopy or $1.50 for icrofiche. Advance payment is required. Make check or money order payable to Microfiche Publications.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × 3 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be anned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible fter a reduction of 50%. The caption of each axis should be lettered parallel to its axis. Background grids should ot be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. ach figure should be identified on the back with the author's name and the figure number. Figures are to be cited the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten, with an Arabic number if necessary for ference placed in parentheses to the right of the equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate ge at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts' Service Source Index*. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
